STRENGTHS

- Frontend architecture, feature boundaries and shared layers.
- Typed API contracts, DTO mapping and async loading/error states.
- Complex product rules: roles, permissions, forms, cache and state transitions.
- Technical requirements, backend/design alignment and delivery ownership.

EXPERIENCE

Frontend Web Developer

Confidential company

Sep 2024 - Jan 2026
1 year 5 months
Product work

Frontend team lead for a real-time game launcher built from scratch. Owned architecture, API requirements, technical tasks, launcher/game-module flows and stable browser behavior.

React.js, TypeScript, Game launcher, Arcade games

Frontend Web Developer

DATAxWAY

Aug 2023 - Jun 2024
11 months
Bishkek, office

Built product interfaces, marketplaces, admin panels and SEO-oriented websites from scratch to production while keeping parallel projects maintainable.

React.js, TypeScript, Frontend architecture

Frontend Web Developer

GetByVerto

Aug 2022 - Aug 2023
1 year 1 month
Remote

Delivered Next.js product frontend remotely with typed backend contracts, predictable state and disciplined request handling.

Next.js, TypeScript

Frontend Web Developer

Welive Turkish Company

Jan 2022 - Jul 2022
7 months
Bishkek, office

Implemented frontend features for web products in a fast-moving product environment.

Next.js, TypeScript

Frontend Developer

Budgeting OAPISR

Oct 2021 - Jan 2022
4 months
Contract, remote

Built an internal bank budgeting system with formula logic, tables, branch rules, drag-and-drop and frontend-side auto calculations.

Budget systems, Bank branch logic

SELECTED PROJECTS

Arcade Launcher

Confidential game product

Real-time multiplayer arcade game launcher started from zero as frontend team lead.

React, TypeScript, TanStack Query, Zustand, Tailwind

Business Web Systems

Outsource delivery

Marketplaces, service websites and admin panels delivered to production with SEO and backend clarity.

React, Next.js, TypeScript, React Query, Zustand, Tailwind

Exchange Commerce

Barter marketplace

Marketplace flows where users could pay with money or exchange goods, backed by SSR and state discipline.

Next.js, TypeScript, React Query, Zustand, Tailwind

Admin Commerce

Marketplace and admin

Marketplace with roles and administration: legacy cleanup, performance fixes and clearer feature boundaries.

Next.js, TypeScript, Redux Toolkit, SCSS
