STRENGTHS

- React, Next.js and TypeScript in production product interfaces.
- Frontend architecture and decomposition of complex interfaces.
- TanStack Query, Zustand and Redux Toolkit for predictable state.
- REST API, WebSockets, OpenAPI and Orval integrations.
- Complex forms, tables, dashboards and admin panels.

LANGUAGES

- English: B1
- Russian: native

EXPERIENCE

Frontend Developer

NomadGames

Sep 2024 - Apr 2026

1 year 8 months

Bishkek, product platform

Built the frontend of a free browser multiplayer games platform from scratch: application architecture, UI, state management, API integrations and real-time behavior. Designed reusable managers for sound, vibration, asset loading and screen state, and aligned API contracts with the backend team before new features were implemented.

React, TypeScript, Feature-Sliced Design, Zustand, TanStack Query, Centrifugo, WebSockets, REST API, Tailwind CSS

Frontend Developer

DATAxWAY

Aug 2023 - Jun 2024

11 months

Bishkek, office

Delivered e-commerce products, marketplace platforms, SEO-oriented sites and business admin panels. Implemented SSR, SSG and ISR pages, optimized image and font loading for stronger FCP/LCP, and decomposed monolithic UI modules into reusable UI-kit components.

Next.js, React, TypeScript, Feature-Sliced Design, TanStack Query, Zustand, Tailwind CSS, REST API

Frontend Developer

GetByVerto

Aug 2022 - Aug 2023

1 year 1 month

Remote

Developed the frontend for a marketplace with auctions, chats and barter-based deals. Built a typed API layer with Orval, configured TanStack Query caching and invalidation, and extracted repeated marketplace logic into reusable components and modules.

Next.js, React, TypeScript, Orval, TanStack Query, Zustand, Tailwind CSS, REST API

Frontend Developer

Welive Turkish Company

Jan 2022 - Jul 2022

7 months

Bishkek, office

Worked on an e-commerce platform for home goods and room fragrance products. Implemented catalog pages, product cards, forms, tables and admin sections, including role-based interfaces for different access levels.

Next.js, React, TypeScript, Redux Toolkit, Material UI, SCSS, REST API

Frontend Developer

Budgeting OAPISR

Oct 2021 - Jan 2022

4 months

Contract, remote

Built interfaces for an internal banking budgeting system with tables, formulas, calculated data and branch structure. Implemented complex table scenarios, optimized large tables and tree structures, and handled validation errors, slow requests and non-standard UI states.

React, Next.js, Ant Design, Styled Components, REST API
